

RECYBUILD. SOLUTIONS

RECYCLING FOR THE FUTURE

ABOUT US

Our company is a thoroughly Belgian company that values ecology, sustainability, conscious entrepreneurship, circular economy and innovation.

The products we market are proof that sustainability, economy and ecology can indeed go hand in hand with a quality, aesthetic and safe product for both humans and animals.

Recycling for the future is not an empty slogan for us, but a real promise.

By tackling waste, we not only address today's challenges, but also reach out solutions for future generations.

Recycling for the future is not an empty slogan for us, but a real promise.

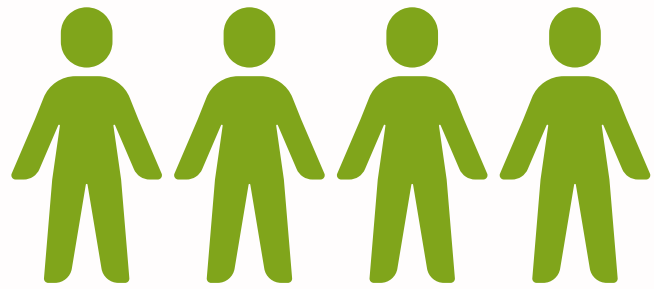

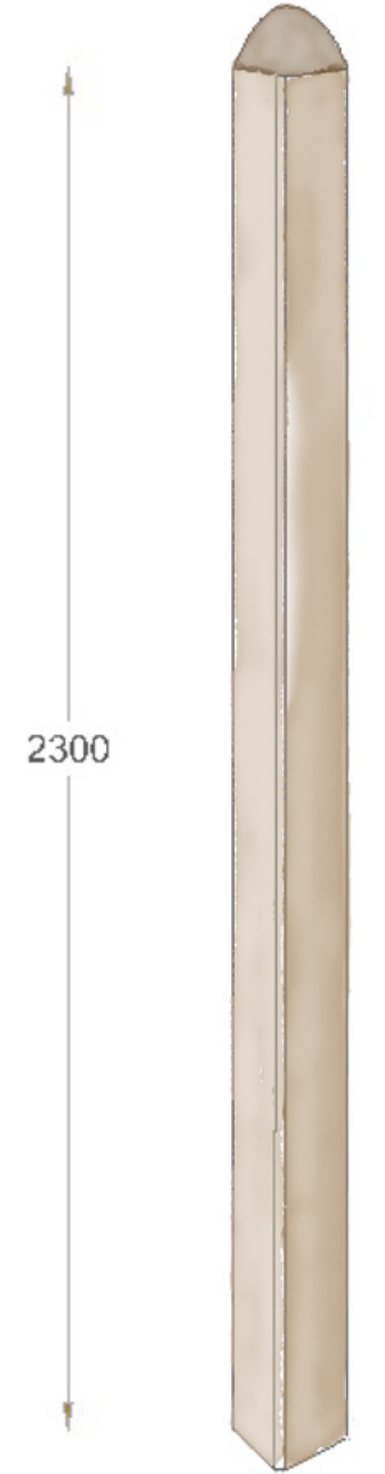

PRODUCTION

RAW MATERIALS

FACTS

 2 POLES

PRODUCTION PROCESS

OUR TECHNOLOGY

- Self-developed extrusion process
- Unprecedented bending stiffness
- out of recycled raw materials
- No addition of wood, metal,...
- End product is itself 100% recyclable

BENDING STIFFNESS: THE TEST

OUR COMPANY

OUR PRODUCTS IMPRESS

CONVINCING PRODUCT FEATURES

SUSTAINABLE

With posts and boards made of innovative recycled plastic, you can count on your fence looking pristine even many years later.

ECOLOGICAL

What you put in your PMD bag at home, we use as a raw material for our products. Even our finished products are, in turn, fully recyclable.

OUR PRODUCTS CONVINCE

MAINTENANCE-FREE

Our products, you don't have to worry about them after installation. You don't have to worry about maintenance, moisture problems, rot,....

SAFE

Our products are safe for both humans and animals.
No more worries about splinters or breaking boards and posts and chemical maintenance products.

OUR PRODUCTS CONVINCE

INNOVATIVE

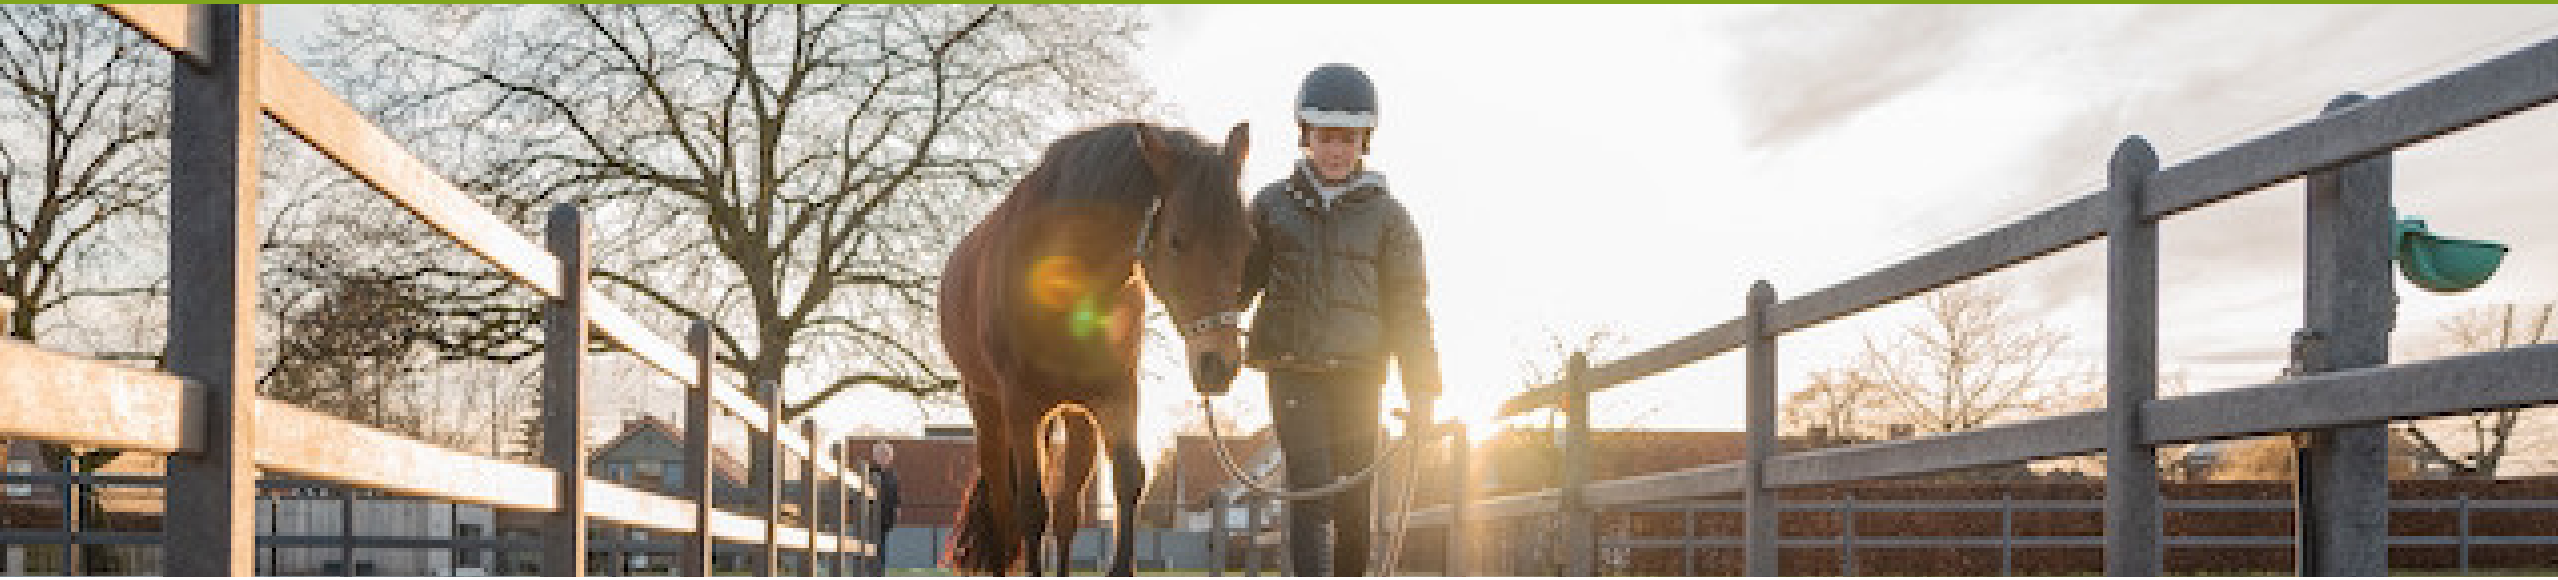

Thanks to out-of-the-box solutions, we manage to process even difficult-to-recycle plastics into a sustainable and improved product.

AESTHETIC

With its stylish, sleek look, our products look great in any setting.

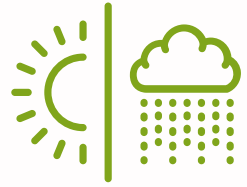

RECYBUILD. SOLUTIONS

RECYCLING FOR THE FUTURE

COLORFAST AND WEATHERPROOF

The Recybuild products have very good color stability and have been tested according to ISO 4892-3. None of the profiles tested exceeded the indicative value of ΔE^* of 3.8. This means that our products are UV resistant, among other things.

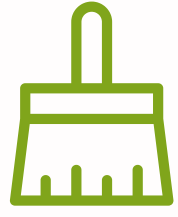

Recybuild Solutions' products can take a beating and are designed to withstand wind and weather without any problem. The material does not absorb water or other liquids.

MADE OF RECYCLED MATERIAL

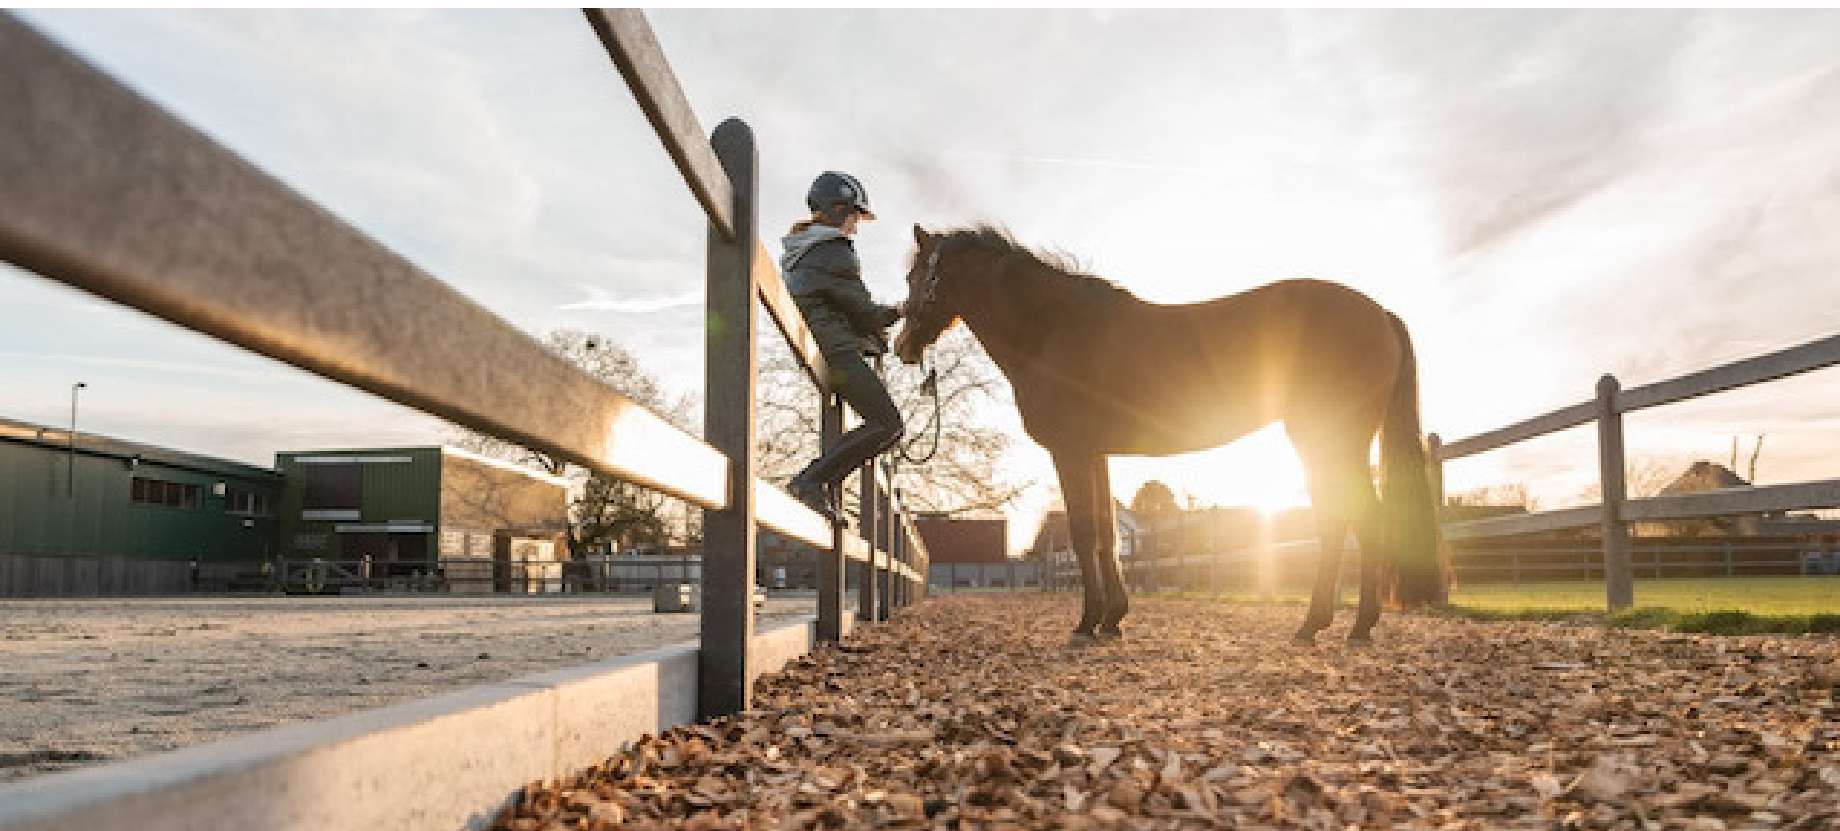

Plastic generates a lot of waste. In our oceans and seas in the form of micro plastic, in our sewers, in our drinking water. Our landfills are full of it. The good news is that plastic can be recycled.

We process for you, your children, your grandchildren that mountain of waste into a beautiful and clean product. Every fiber is made from recycled plastic.

EXTREME LONG LIFE

Our products survive generations. And if something does need to be removed, that product can be 100% recycled in its original application.

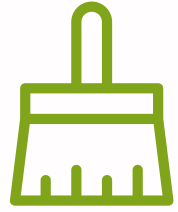

NO MORE WORRIES ABOUT ROTTING

Our products do not rot.

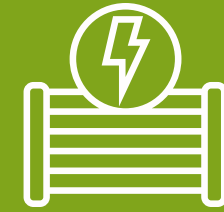

DO NOT BEND

Not even in hot/cold temperatures.

NO MAINTENANCE WITH STAINS AND OTHER PRODUCTS

No more searching for a good product to stain or oil poles and boards. Our products are so environmentally friendly, better for your health (and that of your animals) **AND** there are no extra costs for maintenance products.

ISOLATORS AND SHOCK WIRE

Would you like to use the posts and boards as fencing and combine them with shock wire? That is possible, even without the use of insulators. It is possible to run the scare wire through the posts. This saves costs and work.
